

GEO Modeling Recommendations

Matt Futch

GEO's Recommendations

- Climate Action Plan: 20% reductions in GHGs by 2020
- More aggressive efficiency and renewable scenarios, including distributed generation
 - 30% renewables by 2020 (REDI report)
 - 5% member coop self-generation, system wide
 - Impacts of HB 10-1418, maximize economic development credits for 100 MW of renewables
